## Career Profile

Hi Y'all! 🖐 I'm a dedicated certified developer who specializes in technical leadership and development on various e-commerce platforms, including Adobe Commerce, BigCommerce and Shopify. I also have C# development experience as an active skill. My current day to day includes developer oversight, active development, and client-facing technical project management. I'm very driven and detail-oriented, with over five years of previous experience in QA.

## Experience

### Development Manager

March 2025 - Present

Human Element - Ann Arbor, Michigan (remote)

As a Development Manager at Human Element, I serve as a hybrid leader, combining active software development with strategic team management. I contribute directly to client projects as a senior developer, handling code reviews, releases, and maintaining technical certifications. My role also involves significant

human resource administration, including time management, performance assessment, and fostering employee engagement. I actively shape the technical vision of our development teams, ensuring alignment with company goals and client needs. I lead training initiatives, drive employee development, and participate in hiring and onboarding new talent. Furthermore, I champion process improvements, foster a culture of collaboration and knowledge sharing, and engage in innovating new e-commerce technologies to keep Human Element at the forefront of the industry.

## **Technical Lead**

October 2020 - March 2025  
Human Element - Ann Arbor, Michigan (remote)
